

Entergy's 2024 Environmental Initiatives Fund Grants

Organization	Project	Description	Entergy Service Area
Adopt A Charger	Charge Up! Arkansas	The funding will support expanding the Charge Up! Arkansas initiative by adding seven potential locations at high visibility locations in Arkansas.	Arkansas
Arbor Day Foundation	Energy-Saving Trees Program	Energy-Saving Trees, a strategic tree planting initiative focused on the “right tree, right place” approach, will provide 1000 residential customers with a free tree to plant in their yards through.	Arkansas, Louisiana, Mississippi, Texas
Audubon Nature Institute	Party for the Planet event + Woldenberg Riverfront Park Power Carbon Reduction	<p>Two Audubon Nature Institute programs – a series of sustainability education events and the electrification of Woldenberg Riverfront Park, a 16-acre green space in Downtown New Orleans between the Mississippi River and the French Quarter – were selected for funding.</p> <p>The “Party for the Planet” annual series includes educational events at Audubon facilities such as Spring Into Action, Earth Day, Endangered Species Day, World Oceans Day and Pollination Celebration.</p> <p>Electrification of Woldenberg Park will reduce its carbon impact by eliminating the need to use portable diesel generators from its operations.</p>	New Orleans
Baton Rouge Green Association	Living Roadways	The funding will support the Baton Rouge Green Association’s maintenance of trees along Harding Blvd, including replacing ones that were lost to drought in 2023.	Louisiana
Big Thicket Biosphere Reserve	Restoring and Improving Butterfly Habitat in the Big Thicket Biosphere Reserve of Texas	The Big Thicket Biosphere Reserve will restore and improve its butterfly habitats and provide community educational opportunities.	Texas
City of Somerville	Groundwater Storage Tank Mixer	The City of Somerville will use the provided funding to install a mixer in its ground water storage tank to help eliminate trihalomethanes in the water.	Texas
Delta Compass	The Delta Menagerie and the Great River Road Market	Delta Compass will use the provided funding to support redevelopment of an EPA Brownfield site (The Delta Menagerie) and sustainable cooperative farming (The Great River Road Market) in Greenville, Mississippi.	Mississippi

Entergy's 2024 Environmental Initiatives Fund Grants

Friends of South Louisiana Wetlands Discovery Foundation	Rougarou Fest	Friends of South Louisiana Wetlands Discovery Foundation has been awarded funding to support Rougarou Fest, its free festival celebrating the folklore and culture of Southeast Louisiana. The event focuses on Louisiana's coastal land loss issues, and funds raised from the festival support the South Louisiana Wetlands Discovery Center.	Louisiana
Grounds Krewe	Mardi Gras 2025 Waste Reduction	Grounds Krewe will use its funding to continue producing The Sustainable Throw Catalog, which offers Mardi Gras Krewes sustainable alternatives to traditional throws with the goal of reducing the amount of landfill-bound waste produced by parades.	New Orleans
Lake Hamilton Fire & Rescue	Lake Hamilton/Lake Catherine Emergency Response	Lake Hamilton Fire & Rescue will use its grant award to purchase hazardous materials mitigation supplies for emergency response and containment in and around Arkansas' Lake Hamilton and Lake Catherine.	Arkansas
Mississippi Wildlife Rehabilitation	Wildlife Hospital Nature Center	The funding will allow Mississippi Wildlife Rehabilitation to build new enclosures to house education ambassador raptors and add flight cages for conditioning rehabilitated birds for release back to the wild as part of its plans to open the Valery E. Smith Nature Center as a free destination for the public.	Mississippi
The Nature Conservancy Texas	East Texas Resilience: Forests and Prescribed Fire	The award will support The Nature Conservancy Texas's work to restore and steward the longleaf pine ecosystem in the 5,673-acre Roy E. Larsen Sandyland Sanctuary in Kountze, Texas, through invasive species control, prescribed fires and native ecosystem function.	Texas
Pheasants Forever	Bringing Back Bobwhite Quail to Louisiana	Pheasants Forever will use the funding to work with public land managers on focused habitat restoration and enhancement practices on public lands in conjunction with Hands on Habitat volunteer projects. Land management practices will include prescribed fires, overstory reduction, and hack and squirt treatments.	Louisiana
Rebuilding Together NOLA	Energy Efficiency Home Repair Program	With this grant, Rebuilding Together NOLA will be able to continue the energy efficiency repair portion of its "Safe at Home" repairs program for low-income veteran, elderly, and or disabled homeowners who would otherwise be unable to afford home repairs.	New Orleans

Entergy's 2024 Environmental Initiatives Fund Grants

<p>Refill Jackson Initiative</p>	<p>Jackson Green Corps</p>	<p>The funding will support one year of implementation of youth-positive programs in a variety of environmental and conservation projects that will provide participants instruction on life skills and how to receive and respond to feedback in real-life settings.</p>	<p>Mississippi</p>
<p>Urban Conservancy</p>	<p>Building Climate Resilience and Biodiversity in the "Gateway to New Orleans East": Melia and Pines Village Neighborhoods</p>	<p>Urban Conservancy will use this grant to help build climate resilience and biodiversity in the Melia and Pines Village neighborhoods of New Orleans East through initiatives to educate residents on green infrastructure best practices and how they reduce flood risk and energy costs by increasing water storage, countering the urban heat island effect, and increasing biodiversity.</p>	<p>New Orleans</p>
<p>Woodlands Conservancy</p>	<p>Restoring Habitat for resident and migratory birds</p>	<p>This grant will support Woodlands Conservancy's efforts to restore native understory in forested areas where non-native, invasive vegetation has been removed. Once dead and fallen non-native trees are removed and/or turned into mulch, community and corporate volunteers will fill the gaps in the forest understory with plants of high nutritional benefit to birds.</p>	<p>Louisiana</p>
